Occupational Health  
Personal Injury  
Road Traffic Accident  
Historic Sexual Abuse

## SUMMARY

Dr Halari works as a Consultant Chartered Clinical (Neuro)Psychologist both in the NHS and in the independent (private) sector. Her clinical work involves assessing and treating children and adolescents as well as adults.

She specialises in assessing and treating psychiatric/(neuro)psychological and developmental disorders; such as psychoses, bipolar disorder, affective (e.g. depression) and anxiety disorders, ADHD, autism spectrum disorders (including Asperger's disorder), voyeurism, dementia, personality disorders. Dr Halari offers specializes in neuropsychological assessments, psychological, suggestibility, personality, psychometric and risk assessments (HCR-20, START). She has specialist experience in neuropsychology and uses psychological approaches which include: Cognitive Behavioural Therapy, Schema focused therapy, cognitive remediation therapy (ADHD, Bipolar) positive psychology, Narrative, psychodynamic, person centered, humanistic and systemic therapies. In addition, she is a trained clinical hypnotherapist.

In addition to her work as a clinician, Dr Halari is an honorary senior lecturer at the Institute of Psychiatry, Kings College London and is involved in academic and clinical research both at Imperial and The Institute of Psychiatry, London. She has published widely in peer reviewed journals in the field of psychology and psychiatry.

## SUMMARY OF MEDICO-LEGAL/EXPERT WITNESS WORK

I have experience of providing medico-legal reports in **criminal law, family law, personal injury, capacity, immigration and asylum accident trauma, PTSD, anxiety, depression, (neuro) psychological rehabilitation, work related stress, employment law, occupational injury, effects of medical/clinical negligence, and disability discrimination.**

I specialize in working with Sri Lankan, Indian and African Nationals.

I have extensive experience of preparing reports for cases relating to **Immigration law, family proceedings and criminal law.**

I specialize in **immigration/asylum, neuropsychological assessment of cognitive, emotional and behavioral consequences of acquired brain injury** in adults following **road traffic accidents, assaults** and assessment and diagnosis of **ADHD and Asperger's** and **personality and risk assessments.**

Specialists groups I work with include: Adolescents, Adults and older adults, adolescents, in patients and out patients, immigration and asylum individuals and families.

I have acted for both Claimants and Defendants and as a single and single joint expert.

**OTHER LANGUAGES SPOKEN:** French, Hindi, Gujarati

Unit G03, High Weald House,  
Glovers End, Bexhill on Sea,  
East Sussex, TN39 5ES

01424 444130

office@expertinmind.co.uk

## Psychometric Testing

Assessment of intelligence (I.Q.), memory testing and other cognitive functioning in the areas of Learning Disability, general adult, adolescent, and older adult populations.

## Family Work

I have experience in providing reports to statutory services and the Courts on matters of Child Protection where the main carers have mental health problems. My experience includes the risk assessment, treatment and management of parents with severe enduring mental illnesses, severe personality disorders and offending behaviours. I have provided assessments for children and parents where there are concerns about family functioning, neglect and parenting capacity. I have assessed children and families who are refugee and asylum seekers and have been instrumental in highlighting their psychological needs. In addition, I have provided psychological reports examining the psychological impact of deportation on children and their families.

I have provided psychological reports for the following areas:

- The psychological assessment needs of unaccompanied (children and young people) asylum seekers.
- The impact of neglect, violence and poor parenting on a child's cognitive, behavioural, emotional and social development
- The psychological assessment needs of looked after children
- Cognitive profile of parents and children (including IQ, insight and capacity)
- Parents' ability to adapt to children's changing developmental needs
- Parents ability to meet the emotional, social, educational and cognitive needs of their children
- Parents' insight into their own mental health/addiction issues and their impact on parenting
- Parents ability to reflect on and change parenting behaviours
- Abuse, neglect, bonding/attachment issues, adoption, fostering.
- Child Protection.
- The impact of parents enduring mental illnesses such as schizophrenia on parenting.
- The impact of a severe personality disorder on parenting.
- Risk posed by a parent with mental health diagnoses when considering granting residency orders.
- The ability of an adult with severe mental health problems to safely supervise access visits.
- Opinion on mentally ill adults with multiple histories of being perpetrators of abuse.
- Risk assessments (domestic violence, drugs and alcohol)

## Assessment of Children and Adolescents

- Cognitive assessments
- Psychological assessments
- Risk assessments
- Assessing the attachment between siblings and parents
- Assessing parenting/care needs of children
- Assessment and treatment of ADHD
- Assessment and treatment of Autistic Spectrum Conditions
- Neuropsychological assessments

- Adoption
- Impact of domestic violence and drug abuse on children.
- Psychological and emotional needs of children and families.
- Assessment of risk upon a child's functioning
- Impact of change on child/adolescent.

Family therapy for people with mental health difficulties.

## **Adult assessments**

- Assessment of Personality disorders
- Assessment and diagnosis of Psychopathy (PCL-R)
- Social Inference, perception deficits e.g. TASIT
- Anxiety, depression, obsessive compulsive disorder (OCD) and other psychological problems
- Assessment and psychological treatment of psychoses and affective disorders
- Capacity
- Risk assessments (HCR-20, Sexual offenders risk assessment)
- Assessment re parenting skills
- Neuropsychological assessments (e.g. IQ)
- Suggestibility
- Post Traumatic Stress Disorder
- Psychiatric/Psychological Injury (PTSD, Adjustment Disorders, Anxiety and Depression and other psychiatric diagnoses)
- Assessment and treatment of Neurodevelopmental Disorders
  - ◊ Diagnostic assessment of Autistic spectrum disorders (ASD), including Asperger's disorder
  - ◊ Assessment of Attention Deficit Hyperactivity Disorder (ADHD).
- Neuropsychological assessment of brain functioning following head injury, Drug, alcohol & solvent abuse, poisoning and other cerebral assaults/injuries.
- Assessment of:
  - ◊ malingering
  - ◊ mental capacity
  - ◊ fitness to plead
  - ◊ fitness to work
  - ◊ criminal responsibility

## **AREAS OF EXPERTISE**

### **Immigration**

Assessment of trauma/PTSD in individuals.

Psychological impact of deportation on children and families.

Offending and deportation

Assessments examining the best interests of children.

Cognitive/memory assessments

## **Psychiatric/Psychological Injury (PTSD, Adjustment Disorders, Bipolar Disorders, Anxiety and Depression and other psychiatric diagnoses)**

Assessment and diagnoses of psychological/psychiatric injury resulting from various traumatic events including RTA, assault, domestic violence, industrial accident, war, torture, bullying and harassment, occupational stress, psychological aspects of physical injury/disfigurement, medical/clinical negligence, and other traumatic events.

## **Assessment and treatment of Neurodevelopmental Disorders**

Diagnostic assessment of Autistic spectrum disorders (ASD), including Asperger's disorder.

Assessment of Attention Deficit Hyperactivity Disorder (ADHD).

Impact of ASD and ADHD on fitness to plea, understanding of court proceedings

Treatment of these disorders using evidenced based interventions including CBT and family work.

## **Clinical Neuropsychology (Assessment of Brain Functioning)**

Neuropsychological assessment of brain functioning following head injury, post concussive states, Dementia (e.g., Alzheimer's Disease, Vascular Dementia, Fronto-Temporal Dementia), Stroke, drug, alcohol & solvent abuse, poisoning and other cerebral assaults/injuries. Assessment of: malingering, mental capacity, fitness to plead, fitness to work, criminal responsibility, educational assessments and special needs.

## **Psychological Therapy**

Psychological therapy, including advanced CBT, for adjustment to head injury and other brain disorders for patients and their partners/carers

Psychological treatment, including cognitive behavioural therapy, systemic, narrative, solution focused in the areas of adult and adolescent mental health difficulties (anxiety, depression, PTSD, psychosis etc.)

## **CURRENT POSTS**

Consultant Clinical Psychologist, The Soke; Lead Psychologist for the ASD and ADHD pathway.

Senior Clinical Lecturer, Institute of Psychiatry, Kings College, London

## **PREVIOUS POSTS**

Head of Psychology, Cygnet Hospital Harrow - Specialist Hospital for people with ASD, and general psychiatry.

Consultant Clinical Psychologist- Neurorehabilitation – working with people who have suffered RTAs, TBIs.

Senior Clinical Psychologist: West London Mental Health NHS Trust, Community Mental Health Team. Specialist areas include neuro assessments, rehabilitation and general adult psychiatry.

Senior Clinical Psychologist: West London Mental Health NHS Trust, Assertive Outreach, Service

## **CLINICAL TRAINING**

- Clinical Psychologist in training at the Royal Holloway, University of London. Placements within Central and North West London NHS Trust include:
- Adult-CMHT (CNWL: Severe and enduring mental health – One year).
- Assessment, complex (formulations) and interventions (psychodynamic, CBT, systemic and schema focussed) with clients (individual and group) and their families with psychosis, OCD, learning disabilities, anxiety disorders, post-traumatic stress, depression, bipolar, personality disorders, self-harm and dual diagnoses.
- Regularly attended referral meetings providing psychological input.
- Experience of liaising with statutory/non-statutory agencies (e.g. MIND).
- Involved in local clinical governance processes. Conducted an audit on the assessing the quality of GP referrals to the CMHT.
- I worked in an in-patient unit carrying out neuro/psychological assessments on clients with personality and psychotic disorders.
- I designed and co-facilitated a group therapy programme underpinned by cognitive, behavioural models and mindfulness training.
- I conducted individual and group assessments and interventions with older adults and was involved in systemic therapy with families, which was part of a reflexive team.
- The placement extended to the mother and baby unit (Central Middlesex Hospital). I conducted psychological assessments for the MDT on puerperal psychosis and postnatal illness. I was a co-therapist in a long-term (8 months) psychotherapy group consisting of women with a range of difficulties including personality, affective and psychotic based symptoms. I was able to use a wide range of approaches.

## **Neuropsychology and neuro rehabilitation**

### **(Royal Hospital for Neurodisability: In-patients)**

Specialist assessments of neuropsychological difficulties in mild, moderate and severe brain injury as well as capacity and consent to treatment assessments. I worked with the nursing staff in implementing behavioural management for challenging behaviour within a consultation liaison model. I was responsible for the administration, interpretation and dissemination of psychometric measures (e.g. WAIS, WMS), as well specialist measures for the assessment of different domains of neural functioning. I co-facilitated a music therapy group, successfully developed and facilitated a group therapy programme for clients with memory impairments. I provided psychological support to the MDT during ward rounds and contributed in complex case discussions. I participated regularly in staff teaching and training forums.

### **Paediatric Psychology (Royal Brompton Hospital)**

I worked with children and adolescents with life-limited illnesses (e.g. cystic fibrosis, cardiac, chronic lung conditions) in both PICU and outpatient settings. I was required to conduct individual and family therapy using cognitive and behavioural models and complete neuropsychometric assessments. The interventions focussed on psychological adjustment, bereavement, management of behavioural difficulties, medical phobias, anxiety and depression. I was involved in debriefing practices attending a staff support group for bereavement.

### **Forensic Psychology (Three Bridges Unit and Orchard Unit, Ealing Hospital)**

This post involves working with offenders who have complex mental health difficulties including men in low/medium secure settings and women in medium/enhanced settings. My duties include completing assessments of personality, neuro/psychometrics, assessing the correlates of the index offence and risk issues/ management.

I treat clients providing CBT for psychotic symptomatology, anxiety, PTSD and depression as well as behavioural interventions for challenging behaviours. I co-facilitate an aggression management group with male clients and have additionally successfully co-facilitated a 'living with psychosis' group with women. I attend ward rounds regularly and provide psychological input into MDT discussions. I contribute to CPA and service development meetings.

Research Fellow: Institute of Psychiatry, Kings College, University of London

## **PSYCHOLOGICAL REPORTS EXPERIENCE:**

- Risk assessments (including forensic risk and sex offending)
- Neuropsychological reports (child, adult, brain injury; administration, interpretation and communication of neurocognitive assessments including WAIS, WMS, and BADS)
- Personality assessments

## **PREVIOUS ACADEMIC/CLINICAL POSTS:**

- May 2003-Sept 2005: Post-doctoral Research Fellow, Department of Child and Adolescent Psychiatry, Institute of Psychiatry, Kings College, University of London.
  - ◇ Conducting an f(mri) investigation of inhibition in adolescent depression and to examine the effects of prednisolone on cortisol in adolescent depression.
- Dec 2002-Sept 2005: Post-doctoral Research Fellow, Department of Child and Adolescent Psychiatry, Institute of Psychiatry, Kings College, University of London.
  - ◇ Involved in a number of f(mri) studies investigating inhibition in children with conduct disorder, adults and children with attention deficit hyperactivity disorder (ADHD) and the effect of Ritalin on inhibition in ADHD.
- Nov 2002- May 2003: Research Worker-Department of Perinatal Psychiatry, Institute of Psychiatry, Kings College, University of London.
  - ◇ Duties included: writing grant proposals, involved in study entitled: Comparison of endocrine adaptation in recently delivered mothers treated with conventional antipsychotics and quetiapine. Supervised by Dr Veronica O'Keane.
- October 1999- October 2002: PhD Student. Department of Psychology, City University, London and Division of Psychological Medicine, Institute of Psychiatry, Kings College, University of London.
  - ◇ Thesis title: Sex differences in cognition in the normal population and in patients with schizophrenia: behavioural, hormonal and functional MRI investigations. Supervised by Professor Melissa Hines, Dr Veena Kumari and Professor Tonmoy Sharma.

## EDUCATION

- Sept 2004-Sept 2007: Doctorate in Clinical Psychology, Royal Holloway, University of London
- July 2004-July 2005: Diploma Clinical Hypnotherapy, British College of Clinical Hypnosis, London
- Oct 1999- Feb 2004: Doctor of Philosophy, Institute of Psychiatry, Kings College London.
- 1998 – 1999: MSc in Neuroscience, Institute of Psychiatry, Kings College, University of London (Distinction).
- 1995-1998- BSc in Psychology, City University, London. (2 i)
- 1998 – 1999: MSc dissertation: How dopaminergically-mediated personality traits effect habit learning through variations in attentional or reinforcement mechanisms. Supervised by Dr Alan Pickering (St Georges Medical School, University of London).
- 1997-1998: BSc dissertation/ Part-time Researcher Gender Identity Clinic, Charing Cross Hospital, London: Investigated the effects of oestrogen on nurturance and aggression with reference to sexual fantasy in male to female and female to male transsexuals in comparison to a group of normal controls.

## ACADEMIC SKILLS:

- Experience in writing of academic grant proposals and obtaining research ethics approval
- Computer skills (Windows, Excel, SPSS, UNIX, Statistical Parametric Brain Mapping).
- Knowledge of both Functional and Structural Brain Analysis including Magnetic Resonance Imaging (MRI)
- Neuropsychological testing of all domains of cortical and sub-cortical brain function.
- Extensive knowledge of techniques for hormonal assays, including both serum and salivary sampling.
- Areas of research experience: sex and neurocognition, pharmacology, clinical, neurobiological and neurohormonal markers in schizophrenia, depression, Attention Deficit Hyperactivity Disorder (ADHD), clinical trials of effects of typical and atypical antipsychotics on neuropsychological functioning, functional and structural neuroimaging, gender identity disorders, and behavioural neuroendocrinology

## TEACHING EXPERIENCE

- Presently assess and grade coursework for the Doctorate in Clinical Psychology, Royal Holloway, University of London
- Plan to provide teaching/tutorials on CBT with psychosis to year 5 medical students
- Supervision of MSc and BSc students at the Institute of Psychiatry, Kings College London.
- Lecturing undergraduate students on cognitive, biological, abnormal and developmental psychology and neuroscience.
