EXPERIENCE

I am a highly experienced Psychiatrist with over 25 years clinical and clinical research experience in the UK and USA. I currently work as the Senior Researcher at Oxford and Edinburgh Universities and as a Consultant Psychiatrist in the NHS.

I have completed over medicolegal reports over the last 11 years. I have a particular interest in neuropsychological outcomes, traumatic brain injury and cognitive disorders following personal injury. My work is currently split at 90% claimant and 10% joint instruction. In addition, I have prepared capacity assessments for clients needing wills and in housing and immigration/asylum proceedings.

I have a special interest in assessing memory disorders, dementia and working with those who are of old age. I have been involved in clinical trials with a focus on the prevention of cognitive impairment and dementia.

Specialist Registrar in Neuropsychiatry and Clinical Research Fellow, Maudsley Hospital and Institute of Psychiatry, London

I had six clinical sessions per week in neuropsychiatry. Involved continuing work on two research projects; 1) Main investigator on functional MRI study of decision-making and memory in bipolar I disorder and healthy controls, involving task design and analysis with SPM; 2) Main investigator on study of the prevalence of capacity and its neuropsychological correlates in general hospital patients examining capacity to consent, decision making and their neuropsychological associations in general hospital patients.

2001-2003

Part time MSc in Cognitive Neuropsychology, University College London.

Thesis on correlations between decision making and multitasking tests in specific brain lesions.

RESEARCH POSITIONS

November 2003 - April 2007

Research Neuropsychiatrist

Vietnam Head Injury Study Phase III, National Naval Medical Center and National Institutes of Health, Bethesda, Maryland, USA . Involved running the research team in the current phase of this multidisciplinary, long- term research project that is following up the neurological and neuropsychological outcome of head-injured Vietnam veterans. The investigation focused on planning, reasoning, social cognition and their breakdown in patients with penetrating head injuries to the prefrontal cortex and related cortical and subcortical structures. Other domains investigated included memory, skill learning and functional neuroplasticity. Involved neuropsychological and psychiatric testing, data analysis and writing up of results, as well as supervising four research assistants and data-entry personnel.

April - October 2007

Senior Clinical Researcher

Department of Psychiatry, Mount Sinai School of Medicine, New York, NY, USA. Involved coordinating a number of ongoing clinical trials studies in subjects with Alzheimer's disease, as a well as planning and writing up data from new studies in old age psychiatry.

October 2007 - February 2011

Senior Research Data Analyst/Fellow Department of Radiology, Nuclear Medicine, Johns Hopkins University, Baltimore, MD, USA

Involved managing a team of research assistants and clinical fellows, in order to run approximately 20 ongoing clinical studies (both pharmacological and basic science research) involving PET imaging of neuropsychiatric disorders. I was responsible for PET scan data and behavioural data analysis, grant applications and writing up results for publication.

March 2011 - June 2014

Clinical Research Fellow in Psychiatry, Imperial College London/West London Mental Health Trust, UK

Involved clinical research in old age psychiatry, including clinical trials and a study of neuropsychological and PET imaging outcome in mild cognitive impairment treated with stem cell therapy. I was also involved in DTI and PET TBI imaging research with Prof David Sharp at Imperial College. I did two consultant-level clinical sessions per week in old age psychiatry.

July 2014 – May 2016

Consultant Psychiatrist and Director, Clinical Trials Facility, and Clinical Research Lead for Cognitive Impairment and Dementia, West London Mental Health Trust

Honorary Senior Lecturer, Imperial College London, UK

WLMHT lead, Frailty Steering group, NIHR North West London CLAHRC

Imperial College Healthcare Partners North West London Neuro-Rehabilitation Working Group member

Consultant Psychiatrist, Partnerships in Care, Grafton Regis, Northamptonshire and Burton Park, Leicestershire

Involved clinical sessions and research in old age psychiatry and brain injury, and running a novel head injury clinical service. I was director of the WLMHT Clinical Trials Facility and carried out research in Traumatic Brain Injury using PET and DTI imaging with Prof David Sharp at Imperial College. I was the Clinical Research Domain lead for Cognitive Impairment and Dementia at WLMHT.
